

HYDROGEN FOR CLEAN TRANSPORT

FUEL CELL AND HYDROGEN INITIATIVES PAVING THE WAY IN EUROPE
22 September, Brussels

AGENDA

Hydrogen for Clean Transport is a partnership between the Fuel Cells and Hydrogen Joint Undertaking and the flagship hydrogen projects: HyFIVE and H2ME. Seven global vehicle manufacturers Audi, BMW, Daimler, Honda, Hyundai, Symbio & Toyota will come together for the first time to demonstrate their commitment towards continued FCEV deployment in Europe.

During the morning session, sector experts will share the conclusions of the HyFIVE project, showcasing the advances made by hydrogen technology in the transport sector and demonstrating how hydrogen will play a vital role in decarbonising the sector by 2040. An expert panel will discuss the business case for FCEVs in the afternoon and outline strategies for overcoming the remaining challenges to widespread commercialisation in Europe.

Conference opening | Press statement | 09:30 – 10:30

EU Charlemagne building, esplanade and registration area

09:30 - 10:30 30' Coffee and registration

10:00 – 10:30 30' Press Statement
