

Lift hydrogen up in Carrefour

The largest deployment of hydrogen powered fuel cell forklifts in Europe

November 22, 2018

Carrefour Supply Chain, 5 rue des Frères Lumière, 62880 VENDIN LE VIEIL (France)

HyLIFT-EUROPE Project Consortium, in cooperation with Carrefour, is pleased to invite you to the project final event.

The technology of **hydrogen powered fuel cell forklifts and warehouse trucks and the associated refuelling infrastructure** are ready for the market rollout and will play a significant role in the logistic sector offering a clean and competitive solution for large fleets operated at logistic sites all over Europe.

The HyLIFT-EUROPE project, co-funded by the Fuel Cell and Hydrogen Joint Undertaking (FCH JU), has significantly contributed to the market development

and strengthens its important results by presenting the largest fleet of hydrogen powered fuel cell materials handling vehicles in Europe! Carrefour is deploying 137 hydrogen powered fuel cell forklifts and warehouse trucks in its warehouse at Vendin Le Vieil, France, provided by STILL and supplied with hydrogen via an Air Liquide hydrogen refuelling station enabling indoor refuelling.

On 22 November 2018, important stakeholders of the logistics sector will convey at the Carrefour site in Vendin Le Vieil to get insights and discuss the future of this market and will have the opportunity to experience the operations in the facility hands-on.
