World road transport
organisation driving
sustainable mobility of
people and goods

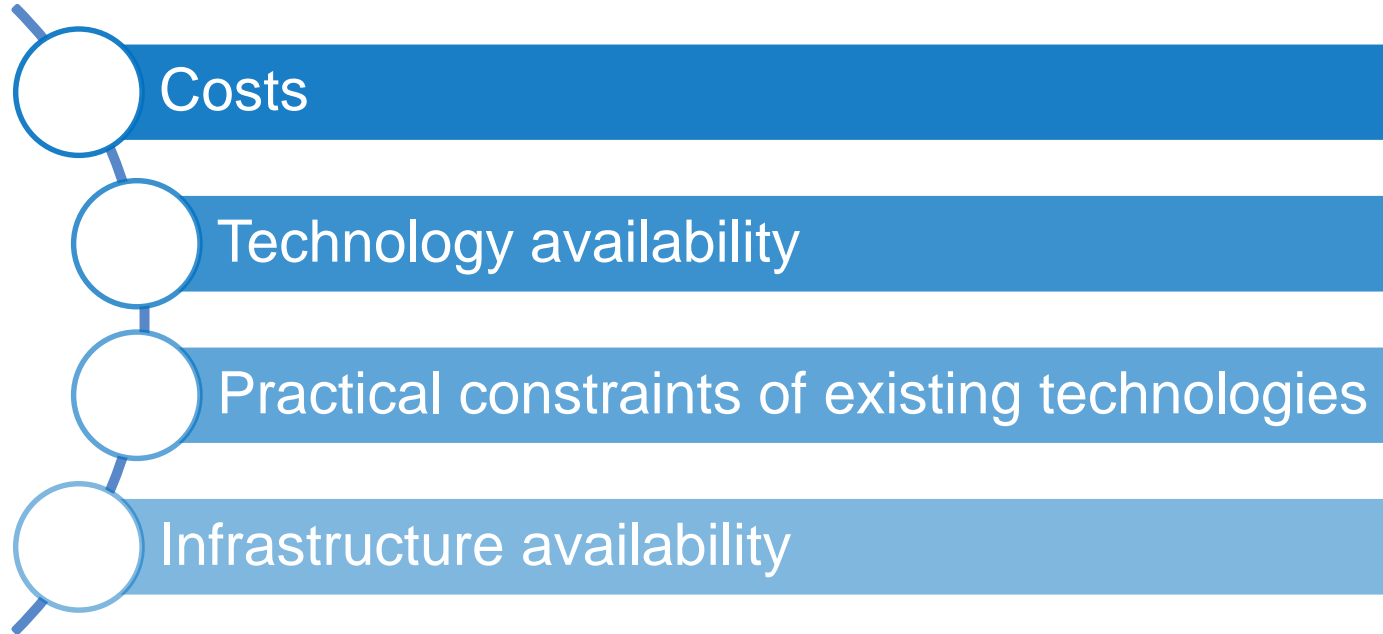

Leading solutions the world needs to move better

Alternative fuels options

Operators need all alternative fuel options on the table as there is no silver bullet and different solutions will be appropriate for different problems

Criteria for alternative fuels

The hydrogen option – situation today

	Costs	Technology availability	Practical constraints of existing technology	Infrastructure availability
Hydrogen fuel cell vehicles				

Transport operators' message on costs:

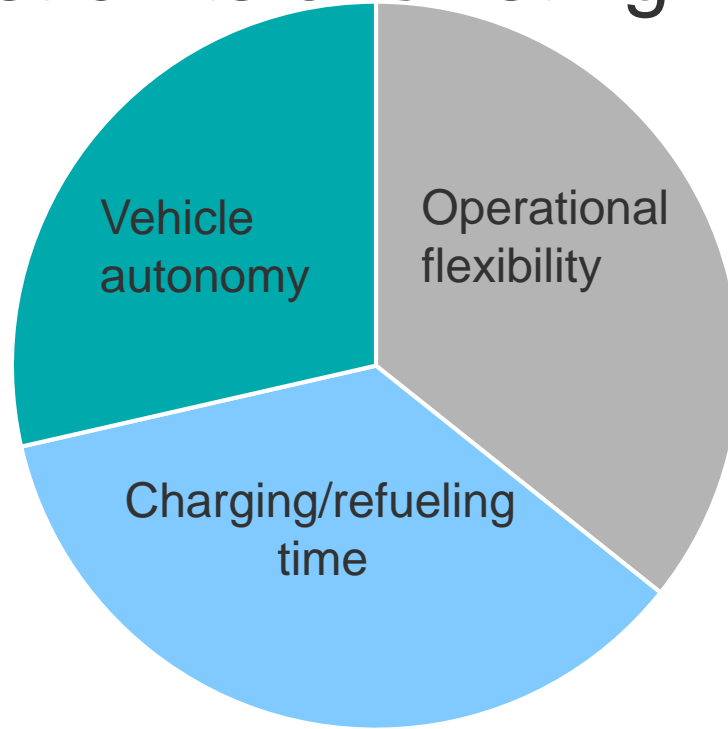

FAIRNESS

AFFORDABILITY

of cost allocation
amongst stakeholders

Practical constraints of existing technologies

Fuel celled vehicles better suited to long-haul transport compared to battery electric vehicles

Thank you!
