Photoelectrochemical Demonstrator Device for Solar Hydrogen Generation

Project Deliverable Report – D8.1 Project website

Deliverable title: Basic framework of website database is online and operational
Deliverable nature: Other
Dissemination level: Public
Lead beneficiary: EPFL
Contracted date of delivery: Sep-14
Actual date of delivery: Mar-15
Author(s): Matthew Mayer (EPFL)

PECDEMO is a Collaborative Project co-funded by FCH JU under the call SP1-JTI-FCH.2013.2.5. GA n°: 621252. Start date: April 1st, 2014. Duration: 36 months.
TABLE OF CONTENTS

2. Detailed Report on the Deliverable .................................................................................. 1
   2.1. Background and Objectives ....................................................................................... 1
   2.2. Results and Discussion .............................................................................................. 1
   2.3. Conclusions and next steps ....................................................................................... 1

1. EXECUTIVE SUMMARY

An important part of the PECDEMO project is communication of results with both the scientific and public communities. To this end, a project website was established (www.pecdemo.eu) which provides information about the project, recent PECDEMO news and activities, and dissemination of publications and presentations.
2. DETAILED REPORT ON THE DELIVERABLE

2.1. Background and Objectives

The aim of the deliverable D8.1 was that a “Basic framework of website database is online and operational”. The objective of the website is to serve as a central point of communicating PECDEMO’s innovative research and activities to members of the research field as well as the public audience.

2.2. Results and Discussion

The web domain www.pecdemo.eu was obtained, and a comprehensive project website was built, hosted by EPFL. The site went live on July 15th, 2014. The website features many sections, including About PECDEMO (Project Details, Project Description, Consortium), Partners, Activities (Meetings, Deliverables, Demonstrations), and Dissemination (Publications, Presentations). The front page is shown in Figure 1.

2.3. Conclusions and next steps

The website will be continuously updated with current news and publications from the project.
